| 1 2 | What i | s claimed is: |
|-----|--|--|
| 3 | 1. | A method for removing acrolein from a process stream comprising |
| 4 | | (a) providing a process stream comprising acrolein; and |
| 5 | | (b) reacting said acrolein in the presence of an acid catalyst with a |
| 6 | | scavenger compound containing a reactable thiol or hydroxyl moiety to |
| 7 | | form an acrolein derivative in a refined process stream. |
| 8 | | |
| 9 | 2. | The method of claim 1 wherein said acid catalyst is a solid acid catalyst. |
| 10 | | |
| 11 | 3. | The method of claim1 wherein said process stream further comprises said acid |
| 12 | catalys | st. |
| 13 | | |
| 14 | 4. | The method of claim 1 further comprising adding said acid catalyst to said |
| 15 | proces | s stream prior to said reaction step (b). |
| 16 | | |
| 17 | 5. | The method of claim 1 wherein said reaction step (b) is conducted at a pH of |
| 18 | betwee | en 3.0 and 7.0. |
| 19 | | |
| 20 | 6. | The method of claim 4 wherein said acid catalyst is selected from the group |
| 21 | consisting of glycolic acid and acetic acid. | |
| 22 | | |
| 23 | 7. | The method of claim 1 wherein said scavenger compound contains a reactable |
| 24 | hydrox | cyl moiety. |
| 25 | | |
| 26 | 8. | The method claim 7 wherein said process stream further comprises water. |
| 27 | | |
| 28 | 9. | The method of claim 8 wherein said process stream includes 2.0 % to 3.0% by |
| 29 | weight | water at commencement of said reaction step (b). |

30

10. The method of claim 9 further comprising the step of reducing the water content 1 of said process stream to no more than 0.5% water. 2 3 11. The method of claim 1 wherein said acrolein derivative is an acrolein acetal. 4 5 12. The method of claim 1 wherein said scavenger compound contains a reactable 6 thiol moiety. 7 8 13. The method of claim 12 wherein said scavenger compound is selected from the 9 group consisting of mercaptoacetic acid, 2-mercaptoethanol, 2aminoethanethiol and 10 ethylene glycol bisthioglycolate. 11 12 The method of claim 1 wherein said acrolein derivative is an acrolein thioacetal. 14. 13 The method of claim 1 further comprising separating said acrolein derivative from 15. 15 said refined process stream. 16 17 The method of claim 15 comprising distillation of said refined process stream. 16. 18 19 17. The method of claim 1 wherein said process stream further comprises 20 acrylontirile. 21 22 The method of claim 1 wherein said reacting step is performed in the substantial 18. 23 absence of a cyanide compound. 24 25 19. The method of claim 1 wherein said process stream further comprises acrylic 26 acid. 27 28 20. A method for removing acrolein from a process stream comprising 29 (a) providing a process stream comprising acrolein; and 30

| 1 | (b) reacting said acrolein with a scavenger compound containing a |
|---|---|
| 2 | reactable thiol or hydroxyl moiety at a pH of between 3.0 and 7.0 to form |
| 3 | an acrolein derivative in a refined process stream. |
| 4 | |
| 5 | |
